

Grade Requirements

- Any math course in which a student earns a grade of C- or less is *not* acceptable as a prerequisite for any other course offered by the Department of Mathematics and Statistics, unless stated otherwise in the course description.
- Any math course in which a student earns a grade of C- or less *cannot* be used to fulfill the requirements of the math major or minor.
- Math courses may only be repeated once to meet the above minimum grade requirements for the major. No course for the major may be taken more than twice. **Students who fail to receive a grade of C or better after two attempts in a required major course will be dropped from the major.** Withdrawals do not count towards the attempt limit. Students who are seniors may petition for an exception to this policy.
- A pass grade (P) does not count toward the major or minor unless the only grade available is Pass/Fail; in this case, consent of the Department is required.
- A student who has received credit for a course may not take one of its prerequisites for credit at a later time.
- The Grievance Procedure of the Department of Mathematics and Statistics can be found here.
